

1.5 kw solar inverter factory in Cape-Town

Overview

What types of solar inverters are used in Cape Town?

String inverters are the most common type and are used in larger solar systems, while microinverters and power optimizers are used in smaller systems. Solar inverters in Cape Town are solely responsible for more operational functions than any other PV system component.

How do solar inverters work in South Africa?

Solar inverters in South Africa are responsible for continually tracking your solar array's voltage to figure out the maximum power at which your solar panels operate, ensuring the system produces the most and cleanest power at all times. There are many different sizes available for inverters.
