14500 battery cell size

Overview

What are the dimensions of a 14500 Lithium battery?

The dimensions for the 14500 lithium battery are like those of an AA alkaline battery. The AA battery dimensions are 14mm x 50mm, like the 14500 battery. The 14500 battery is a rechargeable lithium-ion battery. AA batteries have alkaline chemistry, nickel-cadmium batteries, and lithium-ion batteries.

What is a 14500 battery?

The 14500 battery is a rechargeable lithium battery, but its size and shape look like an AA battery. The 14500 battery is a 3.7-volt battery. It is a small-sized and low-weight battery, and the lithium-ion 14500 battery comes with options to use for portable devices like flashlights, torches, and other small electronic devices.

What is the difference between 14500 and 18650 batteries?

Both 14500 and 18650 batteries are types of lithium-ion batteries. They differ in size and capacity. The 18650 battery is larger and heavier than the 14500 battery. Because of this size difference, it cannot be used in devices that need AA-sized batteries. Here's a quick comparison table: The 18650 battery is larger and can hold more energy.

Is a 14500 battery the same as a AA battery?

Not always. While the 14500 and AA batteries are similar in size, the voltage difference is significant. A 14500 battery delivers 3.7V (fully charged up to 4.2V), while a standard AA battery supplies just 1.5V. Using a 14500 in a device designed for AA batteries could damage the device unless it's rated for higher voltage.
