

150-foot energy storage container for wastewater treatment plants in Tashkent

Overview

What is an intelligent containerised waste water treatment plant?

Intelligent containerised waste water treatment plants are ready to use immediately on delivery. A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

How will Tashkent improve sanitary and epidemiological condition?

The project will improve the sanitary and epidemiological condition of the Sergeli, Bektemir and Yangihayot districts of Tashkent and sewerage services for almost 1.5 million residents. More than 500 thousand citizens and 100 enterprises and organizations will have access to centralized sewerage services.

When will Tashkent's new wastewater treatment plant be fully operational?

The construction of the project is expected to begin in 2026, with the plant scheduled to become fully operational by 2030. Upon completion, the facility will serve approximately three million people in Tashkent and surrounding cities and replace the two existing wastewater treatment plants in Salar and Bektimir.
