

16kw sunsynk inverter factory in Vancouver

Overview

What is a sunsynk 16 kW inverter?

The SunSynk 16 kW inverter offers a complete single-phase solution and incorporates an inverter, charger and MPPT charge controllers. We have taken the Sunsynk Hybrid Inverter to the highest level. Our new Sunsynk MAX is the most powerful low-voltage inverter in the world, achieving a maximum output power of 16kW and battery charge current of 275A.

How efficient is a sunsynk inverter?

The CT coil measures the power and the inverter will reduce power when too much power is detected going to the grid. Even better, if the Sunsynk inverter only has 2000W of excess solar, the element will receive the other 200W from the grid. So it is efficient.

Can a sunsynk inverter handle a 4 kW load?

Going through the various parts of the HF design, I can also think of reasons why it is likely easier to optimise there and get higher efficiency whereas LF design is somewhat fixed on what it can do. Simple answer is yes, the 5.5 kW or 8.8 kW Sunsynk inverter will easily handle your load (4 kW) without problems for long periods of time.

How efficient are DSP inverters?

Equipped with sophisticated DSP control technology, these inverters achieve a remarkable maximum efficiency of up to 97.4%, ensuring optimal energy conversion.
