

2 75mwh solar container energy storage system in New-Zealand

Overview

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakākā on North Island. Paris, January 10, 2023 – Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

Is a 35mw/35mwh storage system being built in New Zealand?

The two companies said last Friday (20 October) that their 35MW/35MWh project, in the Waikato region of New Zealand's Upper North Island, has entered the commissioning phase. Infratec general manager Nick Bibby said that the storage system is "the first of its scale to be built in New Zealand".

Will a 100-megawatt solar farm improve New Zealand's national grid?

Located at Ruakākā in the country's North Island, the 100-megawatt (MW) BESS will improve the stability of the national grid, as intermittent renewable power generation increases in New Zealand. The BESS is the first stage of a project that will include the construction of a co-located 130 MW solar farm by Meridian Energy.

How many MW is a battery energy storage system?

It will have a total installed capacity of between 200-300MW. The BESS will connect to an existing 220 kV line via a new 33kV underground cabling into a new switching substation, and then into the Transpower substation, and onto the national grid. Why build a Battery Energy Storage System now?

2 75mwh solar container energy storage system in New-Zealand

Energy Storage

There is growth in renewable energy generation as New Zealand moves to a low carbon economy. But renewable energy like solar and wind are intermittent which means Battery ...

[Saft energy storage system to support New Zealand's ...](#)

Jan 10, 2023 · Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakaka on North Island Saft lithium-ion technology will ...

Energy Storage

There is growth in renewable energy generation as New Zealand moves to a low carbon economy. But renewable energy like solar and wind are ...

[New Zealand's 'first grid-scale battery](#)

Oct 24, 2023 · WEL Networks and developer Infratec have launched their grid-connected battery energy storage system (BESS) in New Zealand.

[A regulatory roadmap for battery energy storage systems](#)

Jun 23, 2025 · This transition will create fundamental changes to our power system as New Zealand moves to a more decentralised system where we no longer purely rely on centralised ...

New Zealand's CentrePort introduces onsite battery energy storage system

Dec 4, 2024 · NEW Zealand, Wellington Port's CentrePort is taking a significant step in its energy transition by introducing an onsite battery energy storage system (BESS). This initiative is ...
