

24V constant voltage relay inverter

Overview

Where can I find 24VDC power relays?

Find a huge range of 24VDC Power Relays at Newark Electronics. We stock a wide range of Power Relays, such as 24VDC, 12VDC, 120VAC & 5VDC Power Relays from the worlds top manufacturers including: Omron Electronic Components, Potter&brumfield - Te Connectivity, Panasonic, Schrack - Te Connectivity & Omron Industrial Automation.

How many volts can a relay withstand?

The insulation withstand voltage coil to the contact is 4000VAC for 1min. The relay features small size, large switching capacity and a large 3 mm contact gap. The relay's small size makes design easier and consumes only 1.92 W.

How much power does a solar relay consume?

The relay's small size makes design easier and consumes only 1.92 W. As the solar inverter market is trending towards larger inverters to generate more power and reduce costs, the IM-NE801 (40 A) provides the necessary capacity and low current consumption to make this possible.

What is im-ne801 energy power relay?

The new energy power relay IM-NE801 has a contact form of 2A, and has a maximum switching voltage of 277VAC and a high current switching capability. The insulation withstand voltage coil to the contact is 4000VAC for 1min. The relay features small size, large switching capacity and a large 3 mm contact gap.
