

2MW solar-powered containerized steel plant in Belmopan

Overview

Where is America's largest solar-powered steel mill located?

America's largest solar-powered steel mill, Rocky Mountain Steel, has recently undergone a significant change in ownership. This facility, located in Pueblo, Colorado, is largely powered by the 300-megawatt Bighorn Solar project, which provides clean energy to the mill.

Where is the biggest solar power plant in the world?

The Colorado Rockies are home to the Bighorn Solar Project — the world's largest solar-powered steel plant. Learn more here. With a goal of lowering emissions in the carbon-intensive steel industry, Evraz Rocky Mountain Steel turned to solar power. Evraz North America owns the plant, located in Pueblo, Colorado.

How many solar panels will Evraz & Rocky Mountain steel mill have?

It also allows the mill's approximately 1,600 employees to stay in the Pueblo area. The project will host 750,000 solar panels spanning 1,800 acres. The project aims to generate 300 MW for the Rocky Mountain Steel mill for Evraz.

Can solar power a steel mill?

The world's first solar-powered steel mills Traditional steel production uses large amounts of fossil fuel energy to generate the temperatures needed, but the industry is working hard to find alternative ways of powering this process.

2MW solar-powered containerized steel plant in Belmopan

[World's largest solar-powered steel mill breaks ground in ...](#)

Mar 2, 2022 · Dive Brief: In a step toward decarbonizing the emission-intensive steelmaking industry, Evraz North America is building the world's largest solar-powered steel plant.

[The US built the world's first solar steel factory](#)

Nov 5, 2021 · Powered by a farm of 750,000 solar panels, the steel plant at Pueblo will become "greener", reducing carbon emissions. EVRAZ Rocky Mountain steel plant in Pueblo, ...

[California inaugurates first renewable steel plant](#)

Aug 3, 2025 · Pacific Steel Group is building the first renewable steel plant in the United States, powered by solar and wind energy.

[Solar energy is fuelling more sustainable steel production](#)

1 day ago · The integration of solar energy is helping usher in a new era of more sustainable steel production, with facilities making the switch to renewable power. As the world becomes more
