

60kW Solar Containerized Water Plant

Overview

What is a containerized reverse osmosis plant?

Containerized reverse osmosis plant includes a multimedia pretreatment tanks, water softener, antiscalant dosing system, antifouling dosing system, reverse osmosis unit with semi-permeable inverse osmosis membranes, ozone generator and ultraviolet sterilizers or post chlorination as a post treatment accordingly.

What is a solar water filter?

Solar water filters can contain sand filter, carbon filter, cartridge filter housing, reverse osmosis system, ultrafiltration system, UV sterilizer accordingly. Here, we explain solar desalination plant with reverse osmosis technology.

What are the benefits of solar water purification system?

Solar desalination system also known as portable solar powered water filtration systems, now we check solar water filter benefits; Desalination with solar energy becomes popular for most of industry. So, solar water purification system clean your water with lowest cost. Hence, solar water purifiers are available for below applications;

What are the benefits of solar water treatment systems?

Solar powered water treatment systems provide clean drinking water by using only the energy from the sun. So, these systems can be used in remote locations, developing countries and for disaster relief. Hence, the considerable advantage of these systems is that they can be stand alone, not requiring a connection to grid electricity.
