

# **60kWh Solar-Powered Container Used for Field Research in the Maldives**

## Overview

---

What is Maldives solar power development & energy storage solution?

**Maldives: Maldives Solar Power Development and Energy Storage Solution 2. Project Summary and Objectives**  
Project Summary: The project involves the development of a 36-megawatt (MW) solar power project and 50 megawatt hours (MWh) of battery energy storage solutions across various selected islands in the Maldives.

What is the Maldives solar project?

The Maldives solar project is a 36 MW solar power project and 50 MWh of battery energy storage solutions development across various islands in the Maldives. It also includes grid modernization for the integration of variable renewable energy with the grid, which will be financed under the proposed AIIB loan.

Are photovoltaic systems effective in the Maldives?

In pursuit of the Maldives ambitious net-zero emissions target by 2030, the adoption of photovoltaic (PV) systems has surged as a leading renewable energy solution. Despite this growth, a critical gap exists – a genuine operational performance assessment specific to the Maldives.

What is the primary energy supply of the Maldives?

The primary energy supply of the Maldives in 2017, which is the latest year with comprehensive energy system data , , and which is used as the reference system in this study, was dominated by fossil fuels, as it is shown in Fig. 1. The majority, or 39% of the diesel consumption is due to the diesel-based electricity production.
