What is SG micro-inverter?

The second-generation SG micro-inverter adds mobile phone communication function, Let you monitor the working status of your inverter anytime and anywhere. This Smart On Grid system improves safety; maximizes solar energy harvest; increases system reliability, and simplifies solar system design, installation, maintenance , and management.

Why is MC4 connector a good choice for solar inverter?

Avoid the risk of miswiring the fire, zero and ground wires. Meanwhile, the DC input is designed with MC4 connector to avoid reversing the positive and negative terminals. (Some customers extend the solar panel cable so that the positive and negative polarity is reversed) Regarding the heating problem of the inverter: this is normal phenomenon.

What if the inverter is not working?

The inverter also has over-temperature protection if the temperature is high. Then the inverter will automatically reduce the working output efficiency. Or stop working. After cooling down, restart. It is recommended to install the inverter in a ventilated, dry and cool place.
