ASEAN EK Solar Air Conditioner Sample

Overview

How many air conditioners are in the ASEAN region?

Today, the ASEAN Regional Policy Roadmap for Energy Efficient Room Air Conditioners (2022-2025) indicates that Air conditioner ownership in the ASEAN region is projected to increase significantly, with estimates suggesting that the number of units will grow from nearly 50 million in 2020 to approximately 300 million by 2040.

Where can I find ASEAN energy-efficient air conditioner results?

The results for each ASEAN member states is available on the U4E Website, along with a summary in Figure E1 and E2. Figure E1. ASEAN Savings Potential of Energy-Efficient Air Conditioners (Three Scenarios) Figure E2. ASEAN Savings Potential of Energy Efficient Air Conditioners (By Country).

What is the demand for air conditioner in ASEAN in 2050?

The residential sector in ASEAN is highly dependent on cooling as a primary energy use along with cooking, making up about 82% of the sector's demand in 2050. Air conditioner (AC) is one of the cooling appliances in ASEAN that will drive energy demand growth in ASEAN.

Why should ASEAN standards be harmonised for air conditioner testing?

The specific objective of this project is to harmonize standards for testing methods for air conditioners among ASEAN Member States, as the necessary preliminary step towards achieving the long-term objectives under the ASEAN Plan of Action for Energy Cooperation 2016-2025.
