

# **Afghanistan Household Energy Storage Field**

## Overview

---

What is the Afghanistan household & enterprise energy diaries study?

The Afghanistan Household and Enterprise Energy Diaries Study is a longitudinal research project on energy and electricity patterns, which represents Activity 3 of the Afghanistan Energy Study (AES), supported by the World Bank and managed by the AES Committee.

Why is electricity important in Afghanistan?

Higher load tools such welding machines, and appliances such as refrigerators, were much more dependent on accessing grid electricity or generators. Electricity is the major component of household and enterprise energy usage in Afghanistan and shapes the lives and livelihoods of people across the country.

What type of energy is used in Afghanistan?

Heating and cooking are central in Afghan household and enterprise energy patterns. Electrical heating and cooking are not widespread. Instead, wood and solid fuels power a variety of heaters and stoves (including bukhari space heaters, sandali, and tabakhana, etc.).

Are stand-alone Energy Solutions a viable option for Afghanistan's rural population?

Nevertheless, as most energy planning studies highlight, given the remoteness, low population density and rough terrain of Afghanistan, stand-alone solutions might be the most cost-effective way to electrify large portion of the rural population for years to come.
