

Athens Solar Electric System

Overview

How many solar panels does Greece have?

Greece currently operates around 9.6 GW of PV systems. Renewable progress Green Tank, an Athens-based think tank, said that the country met 50.5% of its electricity needs in 2024 with renewable energy sources, including solar, wind, and large hydro.

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

How much solar power does Greece have in 2024?

Greece deployed 2.6 GW of solar in 2024, bringing its cumulative installed PV capacity to 9.6 GW by the end of December. Greece installed a record 2.572 GW of PV capacity in 2024, about 1 GW more than the previous year. In 2023, the country added 1.59 GW of PV capacity.

What impedes solar development in Greece?

Currently, probably the main reason that impedes solar development and that makes administrative procedures long and burdensome in Greece, including rooftop solar, is grid availability. In many areas, applications for solar rooftop PV are being rejected due to lack of electricity grid capacity.

Athens Solar Electric System

[Greece: solar PV electricity output 2013-2024](#)

Nov 28, 2025 · Greece's electricity generation from solar photovoltaics reached roughly ** terawatt hours in 2024.

[Top Solar Panel Suppliers in Greece](#)

5 days ago · CPV also generates electricity from sunlight, but unlike conventional photovoltaic systems, it uses lenses or curved mirrors to focus sunlight onto small, highly efficient, MJ solar ...
