Avalo Vanadium Flow Battery

Overview

What are vanadium redox flow batteries?

The energy storage market is growing rapidly. Our subsidiary VSUN Energy utilises vanadium flow batteries (VFBs) to create a reliable and safe solution for the storage and redeployment of renewable energy. What are the advantages of Vanadium Redox Flow Batteries?

What are VFB used for?

.

Are vanadium flow batteries better than lithium-ion?

Vanadium flow batteries' lower degradation than lithium-ion make it a good candidate to compete with lithium-ion for medium duration use cases (4-8 hours), and a potential solution for future long-duration energy storage (8-24 hours or more) needs.

Why are vanadium flow batteries gaining traction?

These cutting-edge batteries are gaining traction due to their enhanced safety features and long-lasting performance. The company's sale of six vanadium flow batteries to Taiwan's National Applied Research Laboratories, totalling 1.1 MWh of capacity, has opened doors to a promising future.

Who makes Sumitomo Electric vanadium redox flow batteries?

This order marks the first Sumitomo Electric vanadium redox flow battery system installation in Australia. Miner and manufacturer Vecco Group has officially opened its Townsville facility to manufacture electrolyte for vanadium redox flow batteries (VRFBs).
