

BESS an outdoor power equipment company in Gothenburg Sweden

Overview

What is a Bess battery storage system?

A fully EU-made concept for smaller BESS products in Europe. A 500kW / 602kWh battery storage system, fully designed in Sweden, containerized in Gothenburg, and delivered to our client in Örnsköldsvik. The system consists of a fire extinguishing system from Siemens, a Swedish-made EMS, and 42 battery modules of 14.3 kWh.

What is a Bess system?

Beyond the batteries themselves, these systems include advanced inverters, control mechanisms, and management tools to optimize charging, discharging, and grid integration. With applications including large-scale industrial deployments, BESS plays a vital role in stabilizing energy systems.

What are Bess applications?

BESS applications are the different ways Battery Energy Storage Systems are used to improve energy management. They help store electricity so it can be used when needed, making power systems more efficient, reliable, and cost-effective. Microgrids: Provides backup power and stabilizes independent energy systems, even if the main power grid fails.

Where does Bess play in Europe?

A trio of big BESS plays in Germany, Sweden and Romania from investor Return, optimiser Flower and EPC firm CIS Group.
