

# **Bdm600 micro solar inverter**

## Overview

---

What is a BDM 600 solar microinverter?

The BDM 600 solar microinverter is designed to support up to two 450W high power panels. Additionally, it features integrated ground (IG) that eliminates the need for grounding conductor (GEC) on the DC side. The unique design of the BDM 600 model is original, functional, and available only from NEP.

How do Nep microinverters work?

NEP microinverters convert the current generated by the photovoltaic modules (DC) into alternating current (AC) to deliver it to the electrical grid. Do you need more information?

Write us! Our mission is to develop cutting-edge clean energy technology and provide next-generation solar inverters.

What is a care microinverter?

Affordable, Reliable and Efficient (CARE) products for our customers worldwide. • NEP microinverters have an isolation transformer and basic isolation between the DC input and the AC output network.
