## Overview

---

Belgium-based PV module manufacturer Belinus has launched an ultra-black double-glass bifacial heterojunction solar module for residential applications. Who makes Belga solar panels?

Belga Solar is the only manufacturer of solar panels in Belgium. Our panels, produced in Wallonia, are designed to offer performance, traceability and durability, whatever the weather. With a suitable installation, you consume your solar energy directly. By adding a domestic battery, you store the surplus for later use.

Where are Belinus solar panels made?

“All solar cells and solar panels produced by Belinus are manufactured in Bloomberg Tier-1 factories with a combined annual capacity of 2,2 GW in Vietnam and Turkey,” a company's spokesperson told pv magazine.

Who is a glass-glass solar company?

We specialise in the research, development, and production of innovative, high-efficiency, ultra-black, Glass-Glass solar panels and high-quality energy storage batteries for homes. Our head office is located in Genk, Belgium, and the company enjoys a strong reputation across more than ten countries in Europe and the United States.

Why should you choose Belga solar?

With Belga Solar photovoltaic panels, produce your own green electricity, reduce your bills and increase the value of your property. Become autonomous and contribute to the energy transition! Elegant, powerful black photovoltaic panels (425-440 Wp), with yields from 20.6 to 20.9%. Ideal for homes and architectural projects.
