

# **Benin Mobile Energy Storage Container 500kWh**

## Overview

---

What is a battery energy storage system (BESS) container?

Battery Energy Storage System (BESS) container is a specialized, modular unit designed to house and operate large-scale battery storage systems. These containers are typically used in applications ranging from grid energy storage and renewable energy integration to backup power and commercial solar Storage Batteries.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.
