

British lithium iron phosphate battery energy storage container supplier

Overview

What is a lithium phosphate battery system?

The system is built with long-life cycle lithium iron phosphate batteries, known for their high safety and durability, making it a reliable choice for renewable energy generation, voltage frequency regulation, and energy storage in industrial parks or commercial buildings.

What are battery energy storage systems (BESS)?

In the rapidly evolving energy sector, Battery Energy Storage Systems (BESS) have emerged as a pivotal technology, enabling efficient storage and utilization of power. The heart of these systems is the battery technology, and among the various types available, Lithium Iron Phosphate (LFP) batteries have gained significant attention.

Which ESS batteries are right for You?

Whether used in cabinet, container or building applications, NESP Series batteries will meet any ESS need. The Narada NESP Series LFP High Capacity Lithium Iron Phosphate batteries are designed for a broad range of BESS solutions providing a wide operating temperature range, while delivering exceptional warranty, safety, and life.

What is lithium iron phosphate (LiFePO₄)?

Lithium Iron Phosphate (LiFePO₄) batteries have a nominal voltage of 3.2V and are an excellent solution for applications requiring a lightweight, high capacity battery with a long lifespan and stability at high temperatures. Lithium Iron Phosphate is based on Lithium-Ion chemistry.
