

China portable power station in Botswana

Overview

Will China build a 100-megawatt solar power plant in Botswana?

A Chinese consortium, led by China Harbour Engineering Company, has secured a contract to build a 100-megawatt solar power plant in Botswana. This project supports the country's revised Integrated Resource Plan, which aims for a 50% renewable energy share by 2036. Scheduled for completion in 2026, the solar plant will.

Will China's solar project influence Botswana's energy landscape?

The project is likely to attract significant attention from both domestic and international stakeholders, given its potential to influence Botswana's energy landscape for years to come. A Chinese consortium, led by China Harbour Engineering Company, has secured a contract to build a 100-megawatt solar power plant in Botswana.

How long will Botswana Power Plant last?

The deal involves an engineering, procurement and construction contract, with operation and maintenance of the power plant for 25 years. The facility is expected to start generation by the end of 2025. Botswana's President, Mokgweetsi Masisi, said the project is a key milestone in the country's energy transition.

When will a 100 MW solar plant start in Botswana?

The project is expected to start generation by the end of 2025. Botswana Power has signed a power purchase agreement for the development of a 100 MW solar plant in Jwaneng, a town in the southern part of the country.
