

# Democratic Congo power system base station

## Overview

---

The DRC has immense and varied energy potential, consisting of non-renewable resources, including oil, natural gas, and uranium, as well as renewable energy sources, including hydroelectric, biomass, solar.

How many TV stations are in the Democratic Republic of the Congo?

Since 1990 many television stations have been broadcasting in the Democratic Republic of the Congo. In 2006, 58 television channels were available. Of these, 38 are in Kinshasa. The Democratic Republic of the Congo has many radio stations, the majority of which are based in Kinshasa.

What is the power sector in DR Congo?

Revised in September 2023, this map provides a detailed view of the power sector in DR Congo. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, natural gas, coal, hybrid, hydroelectricity, solar PV and methane.

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power their facilities.

What is the energy potential of the DRC?

The DRC has immense and varied energy potential, consisting of non-renewable resources, including oil, natural gas, and uranium, as well as renewable energy sources, including hydroelectric, biomass, solar, and geothermal power.
