

# Denmark Aarhus charging pile energy storage box manufacturer

## Overview

---

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

Why is a triple helix cooperation important in Denmark?

It will also be important to combine the different energy sectors, such as electricity, gas, and district heating in order to store excess energy as e.g. heating or green fuels. Denmark has a strong tradition for a triple helix cooperation between universities, industries and the government.
