

Dhaka 2025 Energy Storage Project

Overview

Can energy storage be used in Bangladesh?

Concluded in May 2023, the assignment assessed available energy storage technologies, evaluated the role of energy storage in the current grid conditions, identified potential storage locations, analysed energy storage requirements under variable renewable energy (VRE) integration, and developed a roadmap for energy storage in Bangladesh.

What's in the Bangladesh Power Sector Roadmap?

The roadmap highlights specific use-cases for consideration in the Bangladesh power sector over three different future time horizons. It also includes a summary of indicative policy and regulation actions and interventions that may be considered to enable the deployment of energy storage within the defined time horizons.

Does the EU support green energy transition in Bangladesh?

The EU engagement and financial commitment in support to the green transition in Bangladesh covers different aspects of the power sector. This year, the EU has designed a comprehensive financing package of EU grant support towards Bangladesh Green Energy Transition.

What does Towfiq-e-Elahi Chowdhury want to know about battery energy storage?

Towfiq-e-Elahi Chowdhury expressed his interest in the study and shared the wish to know more about the existing and perspective battery energy storage applications in other countries and Europe. He further encouraged the EU and its member states to invest in other renewable energy applications in Bangladesh.
