

Dili container batteries are not currently in production

Overview

What are the lithium-ion batteries in containers guidelines?

The Lithium-ion Batteries in Containers Guidelines that have just been published seek to prevent the increasing risks that the transport of lithium-ion batteries by sea creates, providing suggestions for identifying such risks and thereby helping to ensure a safer supply chain in the future.

What will the global demand for battery materials be in 2040?

The global demand for raw materials for batteries such as nickel, graphite and lithium is projected to increase in 2040 by 20, 19 and 14 times, respectively, compared to 2020. China will continue to be the major supplier of battery-grade raw materials over 2030, even though global supply of these materials will be increasingly diversified.

Are Qilin batteries a big step forward for the battery industry?

Jiang Yifan, investment consultant at Guotai Junan Securities, said, "The technical indicators of the latest Qilin battery are basically 10 to 15 percent higher than the traditional lithium-ion phosphate batteries, so there's no doubt it's a big step forward for the battery industry."

Who makes Qilin battery?

Contemporary Amperex Technology Co Ltd, the world's largest electric vehicle battery maker, has achieved mass production of the cutting-edge Qilin battery in its new intelligent factory, the company confirmed to China Daily on Wednesday.
