

Djibouti Electricity Uninterruptible Power Supply Equipment

Overview

How is energy used in Djibouti?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How many people in Djibouti have access to electricity?

In Djibouti, 42% of the population has access to electricity. The government's Vision 2035 establishes goals to promote renewable energy source use for electricity generation and to pursue fuel-switching measures from fossil to renewables.

How can Djibouti become an emerging country?

- Develop a sufficient, clean and robust electricity supply to support the economic objectives of Vision 2035, to make Djibouti an emerging country. Strengthening and ensuring energy independence in terms of electricity supply

Reducing fuel poverty among the population.

Does Djibouti have a power grid?

With regard to electricity, connection to the grid remains a critical problem for Djibouti's economy. As a result of the interconnection between Djibouti and Ethiopia, the output of the Djibouti Electric Power Utility (EDD) rose by 13.6% in 2013. However, the increase in electric power generation is only partly passed on to the population.
