

Does Turkey have too many 5G base stations

Overview

Does Turkey have a 5G network?

In addition to these technological breakthroughs, the country's operators have invested in fibre infrastructure, with Vodafone Türkiye having trialled a 1Tb/s service in late 2021 to support its 5G network backhaul and improve the quality of its fixed infrastructure.

Does Türkiye still need 5G?

European Commission's Türkiye 2023 Report notes that there was no progress reported in the procurement of 5G. Türkiye still needs to allocate additional frequencies for the development and predictability of the sector. In 2022, 94.1% of households had access to the internet, increasing from 92% the previous year.

Why is 5G important for Türkiye?

The transition to 5G is viewed as a significant opportunity to reduce reliance on foreign technology and enhance local innovation. Türkiye's broader development strategy, as outlined in the 12th Development plan, emphasizes supporting pioneering technologies that drive green and digital transformation.

When will the 5G rollout start in Türkiye?

Localization efforts in these areas are planned to begin in the near future. Türkiye is accelerating preparations for the nationwide 5G rollout, targeting a 2026 launch, with efforts focused on domestic production, technological independence, and the integration of advanced technologies.
