What is a power bank?

A power bank is basically a portable battery to allow you to easily charge devices on the move. For me, I like to carry a small power bank on most of my walks as while I often use paper maps while walking, I use my phone to navigate to and from the start of a walk.

What is power bank capacity?

Power bank capacity is measured in milliampere-hours (mAh), and gives you an idea of how much charge the battery holds. This is an important factor to consider when buying a power bank as will vary depending on if you're looking for something as an emergency backup, or to provide you with reliable power for days at a time.
