

# **Dushanbe EK Uninterruptible Power Supply**

## Overview

---

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

Why is an uninterruptible power supply necessary?

An uninterruptible power supply ( Uninterruptible Power Supply or UPS) has become a necessity rather than a choice in various sectors of life, including industrial facilities, hospitals, homes, and offices. The electrical network may experience situations such as high or low voltage, sudden voltage jumps, or frequency changes.

What is the primary power path in a standby UPS?

The primary power path in a standby UPS often includes LC filters to reduce electrical noise and surge protection circuitry for shielding against voltage spikes. An illustration of a standby UPS system.

What is a double-conversion UPS system?

Instead, the system continues operating normally, ensuring seamless operation without switching delays. Double-conversion UPS systems are the most popular choice for loads above 10 kVA and are commonly used to protect critical infrastructure such as large-scale server farms, storage systems, and networking equipment.

## Dushanbe EK Uninterruptible Power Supply
