

Energy Storage Factory Batteries

Overview

What is a battery energy storage system?

A battery energy storage system, or BESS, is a system that uses batteries to store energy for later use. With the advent of this technology, energy usage could see a complete transformation; allowing access to energy sources when needed while reducing our dependence on traditional energy sources from fossil fuels.

Where is the battery energy storage system made?

The battery energy storage system (BESS) is produced locally in Batangas at a manufacturing facility by Amber Kinetics, an American company.

How much energy can a storage battery store?

A typical storage battery from The Energy Saving Store can store up to 4kWH of energy; enough to power a kettle 37 times. Up to 16kWH of capacity is available, but speak to The Energy Saving Store about your options. Storage batteries qualify for upfront funding from the Energy Saving Trust as an eco-friendly means to power your home.
