

Energy method of communication micro base station

Overview

The increasing energy consumption is a legacy of the fast improvement of ICT (Information and Communication Technology). It is also contrary to the current energy conservation and emission reduction con.

What is micro base station (micbs)?

With the rapid development of wireless services and the improvement of coverage requirements, lots of micro base stations (MicBS) have been added to conventional Macro base station (MacBS) network. Heterogeneous deployment is one of the main features in future cellular network [1, 2].

Can micro base stations improve network coverage?

Conferences > 2019 IEEE SmartWorld, Ubiquit. With the advent of the 5G era, mobile users have higher requirements for network performance, and the expansion of network coverage has become an inevitable trend. Deploying micro base stations (BSs) is regarded as one of feasible approaches to enhance network coverage.

What are the standardized energy-saving metrics for a base station?

(1) Energy-saving reward: after choosing a shallower sleep strategy for a base station, the system may save more energy if a deeper sleep mode can be chosen, and in this paper, the standardized energy-saving metrics are defined as (18) $R_{ie} = E_{SM} - 0 E_{SM} = i E_{SM} - 0 E_{SM} = 3$.

Can a microcell BS switch reduce network energy consumption?

However, the network energy consumptions of base stations have been growing quickly. How to save energy consumption in these dense layered network has become a problem we have to face. In this paper, we proposed a microcell BS (MicBS) switch algorithm to reduce the network energy consumption.

Energy method of communication micro base station

[Energy minimization by dynamic base station switching in ...](#)

Oct 21, 2022 · 5G communication technologies are expected to provide high rate and low delay services. To meet the requirements, more base stations (BS), including macrocell BS (MacBS) ...

[QoS-Aware Energy-Efficient MicroBase Station Deployment ...](#)

Nov 1, 2022 · With the increasing density of base stations, the network energy consumption is increasing and has become one of the important reasons for the excessive greenhouse gas ...

[Energy-efficiency schemes for base stations in 5G ...](#)

In today's 5G era, the energy efficiency (EE) of cellular base stations is crucial for sustainable communication. Recognizing this, Mobile Network Operators are actively prioritizing EE for ...

Energy-Efficient Base Station Deployment in Heterogeneous Communication

Aug 23, 2019 · Deploying micro base stations (BSs) is regarded as one of feasible approaches to enhance network coverage. However,

unreasonable deployment will cause mutual ...

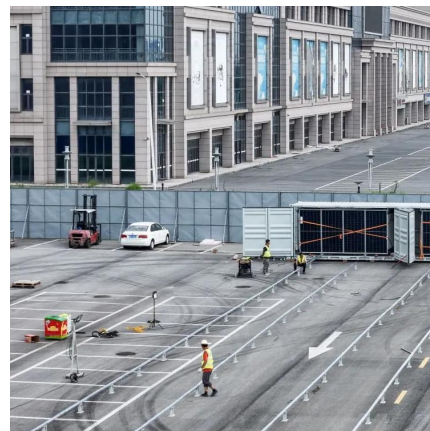

[Energy Consumption Optimization Technique for Micro ...](#)

Nov 25, 2024 · Abstract. In order to solve high energy consumption caused by massive micro base stations deployed in multi-cells, a joint beamforming and power allocation optimization ...

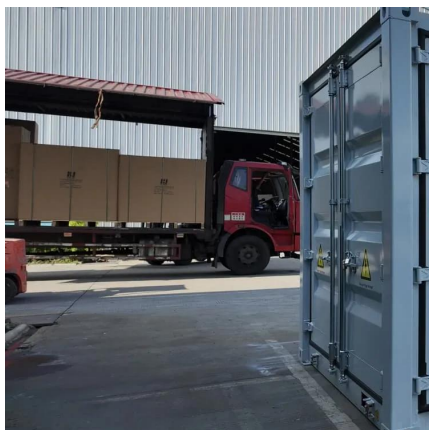

[QoS-Aware Energy-Efficient MicroBase Station](#)

Simulation results show that the proposed combinatorial optimization strategy effectively improves the system energy efficiency compared to the deployment method, regardless of the power ...

[Understanding Energy Efficiency in Communication ...](#)

Jul 28, 2025 · Energy efficiency (EE) metrics are important tools to support evaluation and management of communication networks, and are of key interest in the development of the ...

Renewable microgeneration cooperation with base station ...

Jun 1, 2024 · The energy consumption of the mobile network is becoming a growing concern for mobile network operators and it is expected to rise further with operational costs and carbon ...

pimrc2010_final

Apr 8, 2022 · In this paper we study various homogeneous and heterogeneous deployment strategies incorporating micro base stations with focus on energy efficiency represented by ...

Energy-saving control strategy for ultra-dense network base stations

Aug 1, 2025 · Threshold-based base station sleep strategy is a common base station management method in wireless communication networks, which adjusts the operating state ...
