

# Energy storage 480 MW project

## Overview

---

What is Ningxia power's energy storage station?

On March 31, the second phase of the 100 MW/200 MWh energy storage station, a supporting project of the Ningxia Power's East Ningxia Composite Photovoltaic Base Project under CHN Energy, was successfully connected to the grid. This marks the completion and operation of the largest grid-forming energy storage station in China.

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

What is the energy storage & distributed generation roadmap?

EPRI's Energy Storage and Distributed Generation Program uses this Roadmap as a planning guide for strategizing the direction and alignment of its BESS collaborations and applied research priorities to foster the needs of its Members and EPRI's mission of "advancing safe, reliable, affordable, and clean energy for society."

Will energy storage capacity double by 2030?

United States forecasts that consider state goals, utility integrated resource plans (IRPs), and industry expectations estimate energy storage capacity will more than double by 2030, much of which is expected to be contributed to BESS deployments.
