

European Mobile Energy Storage Container 600kW

Overview

What is battery energy storage?

With battery energy storage, you can store excess power from renewable sources and release it when demand is high, replacing fossil-fuel-based electricity. Volvo Power Unit 2000 (PU2000) is a high-performance energy storage solution powering the future with safety, security and reliability.

Can industrial-scale battery storage systems reduce electricity costs?

Industrial-scale battery storage systems can significantly lower electricity costs for the facilities they are installed, but could also help manage the cost of power for consumers. The quantity of electricity a facility needs to obtain from the grid can be decreased with battery solutions.

Who is E22 energy storage solutions?

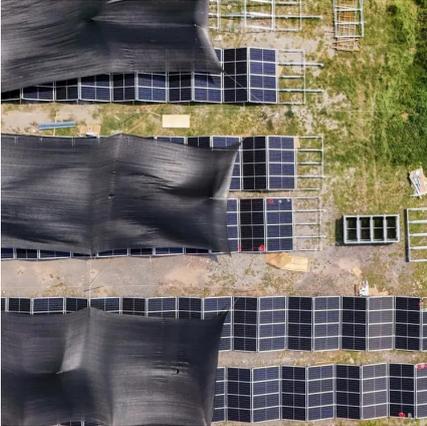

E22 Energy Storage Solutions is a part of the Group Gransolar group of companies with an extensive global presence. As a part of our vision we provide total energy solutions, integrating Photovoltaic (PV) power generation with energy storage, project engineering and energy management.

Why should you choose E22 energy storage solutions?

“Our products are designed to deliver the lowest total cost of energy (LCOE) along with industry leading reliability. E22 Energy Storage Solutions is a part of the Group Gransolar group of companies with an extensive global presence.
