What Is an Uninterruptible Power Supply (UPS)?

.

What is ups & how does it work?

UPS which stands for Uninterruptible Power Supply is a device that provides backup power to electrical systems during power outages or fluctuations. It helps to ensure uninterrupted operation and protect sensitive equipment from potential damage. We offer different types of UPS serving various requirements and the details can be found below.

What is a Riello ups?

Among their offerings are uninterruptible power supplies (UPS) under the brand "Riello UPS," designed to ensure continuous power during outages. Its product range also includes switching power supplies that convert AC to DC power, finding applications in computers, telecommunications, and industrial machinery.

Do ups need a battery?

UPS are equipped with batteries inside to supply power to connected devices in the event of a power outage. There are two types of batteries for UPS: MSE and UPS-only. The charge capacity of a battery decreases as it is used. It is recommended that they be replaced when their charge capacity drops below 80%.
