

Fast charging portable power supply recommendation

Overview

How much power does a portable charger use?

Some more powerful portable chargers also have 100-watt AC outputs, allowing you to insert a standard two- or three-pronged plug. For speedy laptop charging, you likely want a portable charger capable of outputting 100 watts of power or more, while around 18 watts or more could provide fast phone charging.

Why should you use a portable charger?

In a situation like this, a portable charger —also called a power bank or battery pack—can feel like a lifesaver. Backup batteries are even more critical if you need to charge your electronics while the power is out after a storm.

What size portable charger should I buy?

Find out more about how we test. You can find portable chargers in a variety of sizes, but for the majority of you reading this, you're going to want either a compact 10,000mAh or a slightly beefier 20,000mAh portable charger. The Anker PowerCore III is a great all-rounder 10,000mAh charger, but it has its limitations like power output.

How much power does a laptop charger use?

For speedy laptop charging, you likely want a portable charger capable of outputting 100 watts of power or more, while around 18 watts or more could provide fast phone charging. Most models in our ratings get excellent scores for charging speed, but a few power banks have more middling scores.
