

Flow Battery 2025

Overview

What is the international flow battery Forum?

The International Flow Battery Forum (IFBF®) is the leading event for the flow battery community. The IFBF promotes the most recent developments in the science, technology and commercialisation of flow batteries. Our conferences cover a broad range of interests in the research and commercial aspects of flow batteries.

When is the international flow battery Forum 2026?

See you in Budapest on 16-18 June 2026 for the next International Flow Battery Forum! SAVE THE DATE: The 16th edition of the International Flow Battery Forum will take place from 16 to 18 June 2026 in Budapest, Hungary! A pre-conference workshop will open the event on Monday, 15 June. Further information coming soon!.

Are flow batteries already in use?

Flow batteries are already a reality. Fort Carson, a US military base, has contracted Lockheed Martin to build a 10 MWh redox flow battery to store its solar farm's energy. Unlike other new battery technologies that are still in development, flow batteries are already being implemented.

What's new in flow batteries?

Recent research and development in flow batteries is summarised. The importance of fluid flow and mass transfer is highlighted. Studies in small cells with poorly defined flow conditions are considered critically. Modelling approaches are discussed, stressing the need for experimental validation.
