

Foldable containers the best choice for high-efficiency products and superior quality

Overview

What is a foldable container?

A foldable container is one of the specialized container units made for transporting sets or stacks of materials. They are made of dense, sturdy wire mesh and are equipped with rollers for easy movement. These shipping container units are made more cheerful by the availability of a variety of coloured wire meshes. The Manufacturing Process.

What is a foldable large container (FLC)?

Foldable Large Containers (FLCs) are collapsible plastic containers which are used to transport a variety of cargoes. These containers are specially designed to reduce the cost of relocating empty containers while providing maximum product protection and load stability.

What are the advantages of a foldable container?

Compared with normal site office construction, there is cost saving for time, labor, transportation and warehousing convenience. The foldable container is movable with crane or forklift hence better accessibility. Installation and dismantling is also very fast and can be constructed within 25 minutes.

Why should you choose a folding container?

Contact us! Folding containers can give up to an 80% saving in volume and are available in standard footprints and heights. Lid and closure options are also available.
