

Fully automatic battery cabinet

Overview

How many battery cells are in a battery cabinet?

Each battery cabinet is with 240 battery cells in series with contactor, detective unit, sampling line, battery management systems, fuse, etc. BESS employs a sophisticated, multilevel battery management system (BMS) for system monitoring and control. Each battery management system including:

What is a battery cabinet made of?

The cabinets are made of galvanized steel or aluminium, making them easy to position and providing a long service life. A slide-in racking system allows for easy installation of 19" rackmount style battery modules along with rain protected vents on both sides and on top for passive ventilation.

What kind of batteries can be stored in a rack mount cabinet?

All-in-one design, store the leading brands of 19" rack mount type lithium batteries, inverters and controllers. DC48V powered air conditioner, heat exchanger or TEC coolers are optional, which can cool down the devices installed inside the cabinet. Battery Storage Space based on the battery specification.

What is a microgrid Ready battery energy storage system?

The product is an all-in-one microgrid ready battery energy storage system, tightly integrating batteries, BMS, PCS, air conditioning, and fire protection systems. Seamlessly switching between grid and off-grid modes, it allows for flexible configuration of photovoltaics, batteries, diesel generators, and loads.
