

Generator container solar

Overview

The Containerised Solar Generator is a quickly deployable, highly insulated temperature controlled environment, ready to use, factory assembled all weather solar power station. What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

What is a SWT solar container?

SWT solar container uses PV and battery to supply power to the load, and diesel generator as a backup power supply to supply power to the load when PV and battery are insufficient. Designed to provide flexible options that are configured according to your power needs. Scalable and reproducible, ensuring optimal performance and efficiency.

Why do you need a solar container?

Deploy power in hours Perfect for remote locations, construction sites, events, and emergency response situations. Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere.
