Overview

Is Greece a potential energy hub for the Balkans?

Power produced by renewables and hydroelectric plants accounted for 57% of Greece's energy mix, an 8.5% rise from 2022 according to the country's Independent Power Transmission Operator IPTO. The Greek government is positioning Greece as an eventual energy hub for the Balkan region and Europe.

Should Greece invest in pumped hydropower storage facilities?

The pileup of proposals for wind and solar power plants in Greece bolstered the interest in investments in pumped hydropower storage facilities to balance the output from the two intermittent sources. Government-controlled PPC is dominating the map.

Why is Greece preparing a third battery energy storage tender?

Greece is already preparing its third battery energy storage tender, making it one of the most advanced markets in Europe, but acceleration is also evident in the pumped storage hydropower segment. Wind and solar power plants are being built in such quantities that neither demand nor the grid can keep up.

Is Greece a potential energy hub?

The Greek government is positioning Greece as an eventual energy hub for the Balkan region and Europe. Greece will submit an updated energy and climate plan to the EU in June 2024 which will reflect its continued commitment to increasing RES production.
