

Guinea Outdoor Power Local

Overview

Guinea's hydropower plants (Kaleta and Souapiti) now supply clean energy domestically and export 1,174 GWh annually to Senegal, The Gambia, and Guinea-Bissau, supporting regional energy transition and reducing reliance on fossil fuels. Is Guinea a potential exporter of power?

Guinea's hydropower potential is estimated at over 6,000MW, making it a potential exporter of power to neighboring countries. The largest energy sector investment in Guinea is the 450MW Souapiti dam project (valued at USD 2.1 billion), begun in late 2015 with Chinese investment.

What is Guinea's energy strategy?

Includes a market overview and trade data. The Guinean government has announced a long-term energy strategy focusing on renewable sources of electricity including solar and hydroelectric as a way to promote environmentally friendly development, to reduce budget reliance on imported fuel, and to take advantage of Guinea's abundant water resources.

Can China make Guinea an energy exporter in West Africa?

The Chinese mining firm TBEA is providing financing for the Amaria power plant (300 MW, USD 1.2 billion investment). If corresponding distribution infrastructure is built, and pricing enables it, these projects could make Guinea an energy exporter in West Africa.

Does Guinea have a hydropower plant?

Guinea's hydropower plants (Kaleta and Souapiti) now supply clean energy domestically and export 1,174 GWh annually to Senegal, The Gambia, and Guinea-Bissau, supporting regional energy transition and reducing reliance on fossil fuels.
