

# Guinea and solar energy storage

## Overview

---

Does Guinea need a solar power plant?

Guinea imports about 130 megawatts of power from neighboring Senegal and Ivory Coast, but that's insufficient to meet demand. "The solar power plants will support sustainable development and strengthen our energy autonomy," the ministry said, without specifying the project's cost or source of funding.

Will Guinea build a solar power plant in 2022?

The solar projects would bring 180 megawatts of new capacity online in a country with a total installed generating capacity of just 1,200 megawatts in 2022. (Bloomberg) -- Guinea plans to build the country's first solar power plants to increase its electricity production by 15% and cut its reliance on West African neighbors.

How many solar power plants are being built in Kankan & Siguiré?

The construction of two 35-megawatt power plants and a 30-megawatt plant are underway in the gold-rich regions of Kankan and Siguiré, the energy ministry said in statement Friday. Two additional 40-megawatt solar power plants are still being discussed, it said.
