

Helsinki Battery Pack

Overview

Will Alpiq buy 125 MW battery storage project in Finland?

Swiss power producer and energy services provider Alpiq announced the acquisition of a 125-MW battery storage project in Finland and said it would make more investments in the European energy storage sector. Illustration of a BESS project by Yann Bay Architectes. Image source: .

Why should you invest in the battery industry in northern Europe?

Northern Europe is an excellent location for the battery industry, as the availability of raw materials and clean energy is good, production chains are transparent, and sources of battery materials can be traced. Sweco's international team is dedicated to support investors in a developing of a sustainable battery industry across Europe.

What is the European battery value chain?

The European battery value chain responds sustainably to the global need for lithium-ion batteries. Sweco is committed to building a carbon-neutral battery value chain that takes into account social, environmental and social responsibility.

Where is Alpiq's battery project located?

The transaction marked Alpiq's third and largest battery project investment to date, a press statement says. The acquired battery energy storage system (BESS) project, developed by Swedish group Arise AB local unit Pohjan Voima, is located in the municipality of Haapajarvi, around 500 kilometres (310 mi) north of Helsinki.
