

High quality 1 2 kva inverter in Uk

Overview

Which company makes the best solar inverters?

The best solar inverters are generally considered to be those made by SMA and Fronius for standard inverters, and SMA and Victron for hybrid and off-grid inverters.

What are the best battery inverters?

The best inverters for off-grid and hybrid systems include those made by SMA and Victron. These allow the connection of a battery as well as solar panels. Installing a hybrid inverter makes sense, even if you don't intend to connect a battery straight away, as battery storage is becoming more common.

Which Inverter should I Choose?

For small installations, the choice of inverter depends on your specific needs. You can choose between a standard string inverter, a hybrid string inverter (for efficient battery storage addition), or micro-inverters / power optimisers (to increase system output, especially for arrays subject to shading).

What is the efficiency of solar inverters?

Solar inverters are very efficient, typically ranging from 95% to 98%. They are not 100% efficient as they use some power from the solar array to run the DC to AC conversion. Maximum Power Point Tracking further enhances the inverter's efficiency.
