

High quality thermal breaker in Auckland

Overview

What are thermal automotive circuit breakers?

Thermal automotive circuit breakers are devices used to break the flow of current in automotive circuits, in order to protect them against a fault such as overcurrent or short circuit.

What are thermal magnetic circuit breakers?

Thermal magnetic circuit breakers are devices that provide protection against overcurrent in circuits. Circuit breakers use an automatically operated electrical switch to disrupt the flow of current when an overload or short circuit is detected. Thermal magnetic circuit breakers do this using an electromagnet and bimetallic strips.

Where can I buy thermal break insulation in New Zealand?

Insulation Wholesalers offers premium insulation, Thermax B®, ventilation, & weatherproofing New Zealand-wide. Available directly from our centrally located warehouse. Explore our range of thermal breaks to ensure maximum performance in your insulation systems. Shop now for the best thermal break insulation solutions.

What are the different types of thermal breakers?

Thermal breakers protect circuits from excess current in a similar way to a fuse, however, they often feature a switch allowing them to be reset if tripped. Common types of thermal breakers include thermal magnetic circuit breakers and thermal automotive circuit breakers.
