

# How high does the suspended battery cabinet need to be to be used

## Overview

---

Do vented lead acid batteries need a separate battery room?

Vented lead acid batteries installed in medium voltage main substation buildings and unit substations, electrical equipment rooms and control system rack rooms shall not require a separate, dedicated battery room and shall be in accordance with SES E14-S02. The battery room and installation shall comply with IEEE 484, NFPA 70 and OSHA 29 CFR.

What are the requirements for a battery layout?

The layout should accommodate: 2. Structural Requirements Floor loading capacity is critical - industrial batteries typically weigh 1500-3000 kg/m<sup>2</sup>. For VLA (flooded) batteries, acid-resistant floor coatings compliant with AS/NZS 2430.3.2 are required.

How should a battery room be located?

This will reduce the cost and exposure of the dc distribution system. The battery room shall be located in a way that provides access for lifting equipment to be used during initial installation and future maintenance operations. The location shall be as free from vibration as practical.

What are the requirements for an industrial battery installation?

Industrial battery installations require adequate spacing for maintenance, ventilation, and safety. The layout should accommodate: 2. Structural Requirements Floor loading capacity is critical - industrial batteries typically weigh 1500-3000 kg/m<sup>2</sup>.
