

How is the battery station cabinet in Bucharest

Overview

What is Romania's largest battery storage system?

In April, Romania's largest battery storage system, of 24 MWh, was put into operation. It is the first phase of a project totaling 216 MWh. The facility is connected to the Mireasa wind farm of 50 MW, while a 35 MW solar power plant is expected to be added by the end of 2024.

When will Romania's largest battery storage project start?

The original call, which referred to at least 620 MWh, was expected to see projects selected by the end of 2023, according to reports. In April, Romania's largest battery storage system, of 24 MWh, was put into operation. It is the first phase of a project totaling 216 MWh.

Should Romania Invest in energy storage?

Burduja has also called for investments in energy storage, stressing that the Ministry of Energy is making non-refundable grants available for this purpose. Romania wants mature projects that can be implemented quickly and that can help balance the system, he was quoted as saying.

How much storage capacity will Romania have in 2025?

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission system operator Transelectrica, and mentioned by Romania's energy minister Sebastian Burduja in April, 2025.
