

How long will it take for the Porto Novo 5G base station to be repaired

Overview

Will Porto Metro expand by 2030?

The Portuguese consortium led by Ayesa, alongside Grid, was awarded a contract for design and environmental services for Porto Metro expansion by 2030. The contract will see the consortium delivering the services for four new metro lines with a total length of 40 km which will be served by 38 stations.

What is the future of 5G?

The future of 5G is clear: more base stations, wider coverage, and improved connectivity. Industry forecasts suggest that by 2025, the total number of 5G base stations worldwide will surpass 5 million. This expansion will be driven by ongoing urbanization, demand for high-speed connectivity, and technological advancements.

What is the density of 5G base stations in Portugal?

Regarding the density of 5G base stations in Portugal, it was found that at the end of the 2nd quarter of 2023, the average was approximately one station per 12 km², with an increase in density compared to the previous quarter, which shows the growth of the 5G network in Portugal.

What are the challenges with 5G?

One of the biggest challenges with 5G is its energy consumption. A typical 5G base station consumes three times more power than a 4G station. This is due to the need for higher frequencies, greater bandwidth, and more antennas to ensure connectivity.
