

# How many watts does a solar flashlight have

## Overview

---

How many lumens does a solar powered flashlight produce?

Solar-powered flashlights all typically use one or more LED bulbs, but some produce much more light (measured in lumens) than others. Flashlights that can produce up to 200 lumens or more are able to light up to several hundred feet.

How many light modes does a solar powered flashlight have?

Solar-powered flashlights may have between three and seven modes. Some common modes include three types of light intensity (low/dim, medium, and high), slow or rapid flashing lights (either in white or red) for emergencies, and side running lights for lower light situations.

How many lumens can a flashlight light?

Flashlights that can produce up to 200 lumens or more are able to light up to several hundred feet. A brighter light is more useful outdoors than indoors, with the trade-off being that a brighter light also drains a flashlight's charge faster. Did you know?

.

What is a solar powered flashlight?

A solar-powered flashlight with a magnet can be mounted to a car or other metal surface for use as either a set light source or a work light. Solar-powered flashlights often incorporate additional survival and emergency tools.
