Should I upgrade my solar system to AC-coupled battery addition?

If your existing solar system works well, AC-coupled battery addition offers the simplest upgrade path. This approach installs a separate battery inverter alongside your existing solar inverter, allowing both systems to operate independently. Cost considerations favor AC-coupled retrofits for most homeowners.

Why should you invest in a solar battery system?

A properly sized battery system captures your cheap solar power and deploys it when grid electricity peaks at \$0.40+ per kWh. The average solar battery system pays for itself in 7-12 years through energy savings alone, not counting the value of backup power during outages. Maximizing your solar investment represents another crucial advantage.
