

Industrial and commercial UPS uninterruptible power supply

Overview

What are industrial uninterruptible power supply systems (UPS systems)?

We cater to multiple sectors for industrial uninterruptible power supply systems (UPS Systems) through standard or customized solutions. From high amperage manufacturing processes to miniscule backup requirements, these systems can offer efficiency in every application.

What is an industrial UPS system?

The industrial UPS systems produced by SCU, a professional UPS supplier, are specially designed for industrial application with high performance, high efficiency and high protection level. The industrial UPS system provides uninterrupted high-quality industrial uninterruptible power supply for modern manufacturing.

What are the different types of industrial UPS power supply systems?

600V, 480V, 415V, 400V, 380V, 230V and 208V With the latest sophisticated features installed, we can ensure higher levels of efficiency and load protection from multiple issues pertaining to power. At the same time, we assure cost-effectiveness in our industrial UPS power supply systems to safeguard your investments in these critical systems.

Why should you choose Eaton industrial UPS?

In large industrial facilities, power failures are highly detrimental for the operational efficiency. Our Eaton industrial UPS systems (Uninterruptible Power Supply) can mitigate such effects with our advanced functionalities and features. These extensive services include extended power back up and protection against several power quality issues.
